Any other feature(s) you might want considered	<a href="http://www.cs.iupui.edu/~kellykuhn/finalproject/index.html">www.cs.iupui.edu/~kellykuhn/finalproject/index.html</a> <a href="http://www.cs.iupui.edu/~kellykuhn/finalproject/dogWalking.html">www.cs.iupui.edu/~kellykuhn/finalproject/dogWalking.html</a> <a href="http://www.cs.iupui.edu/~kellykuhn/finalproject/nightlyStay.html">www.cs.iupui.edu/~kellykuhn/finalproject/nightlyStay.html</a>  added mp4 video's

The Plan (**completed**) all the following elements; site purpose, needs analysis, goals, both primary and secondary audience. Wire Frame has been added to the main link website index page as with site map.

May assumptions for this web page are people looking for an alternative to current kennel and training programs out there. Since people have been staying home with their pets 24/7 they feel the need to have that same interaction now that things are returning to normal in the world. I anticipated for all browsers – Safari, Edge, Google Chrome, FireFox, Tor, and FireFox. This was

tested using the latest browser information. Data speeds can range from 50 mp's to 1 gig. It depends on what the person has when they view. All programming was completed using a 1 gig connection. Screen size – I used an 27" Monitor and checked for auto sizing.

**Post-Project Analysis** is the interesting part of this whole project. I have listed a few things I learned and something I will never do again when I am programming until I have more experience under my belt.

- What parts of your project did you revise? **I made the cardinal sin after the site was up and functioning and all my columns where correct and thought wouldn't it be great to add a coupon last minute. I did something wrong and all my columns are thrown out of alignment. Why? Thinking I was being clever and adding another element to my webpages. Now all I can hear is professor Harris voice in the back of my head saying, "if it is up and running just fine, leave it alone."**
- What did you learn while creating your project?
- Are there any sections that do not work as well as you would like? **Yes, sadly I am still working on fixing my table alignments for each page after I messed them up. The pages are not as clean and crisp as I would like them to be and how they were before my bright idea.**

3. I found this project to be interesting and challenging on the creative side. It would be nice to take another class in HTML focusing more on design and layout over just coding. I feel design and layout is where I struggle most. It never seems to be as pretty as I want it to be.
